RE: **Important Pool Information**

Please be aware of the following important issues regarding the use of the pool:

- Remember to sign in and out on the pool log.
- Shower prior to entering the pool. Suntan lotion/oils can interfere with pool filter.
- Anyone with intestinal or stomach sickness should not use the pool.
- It is mandatory that infants be outfitted in special sealed swim diapers when using the pool.

The sign in sheet is important in indicating number of swimmers having used the pool (and for how long) and whether extra chlorine or other chemicals should be added. The pool could be shut down anytime if chlorine levels get too low and/or pool water gets cloudy.

We appreciate your cooperation in this important matter. Enjoy the summer.
