RE: **Towing Update**

As some of you are aware cars were towed recently from our parking lot during an overnight sweep by the towing company.

Important things to remember:

- The sticker needs to be visible and on the rear window (with exceptions noted below).
- Do **not** put sticker on tinted glass as it can not be seen in the dark and your car may be towed unexpectedly. Vehicles with tinted glass need to have sticker on front windshield or an area that is visible in the dark.
- Cars with convertible tops should put the sticker on front windshield in case top is removed in the summer.

Remember, the sticker must be visible in the dark but not to obstruct the driver's view when driving.

There are forms available in the Laundry Room or online at www.thehillcondo.com for parking sticker requests or changes.

Reminder that tow signs are installed around the building and tow monitoring overnight by the towing company is in place. Please remind your visitors.

Thank you for your cooperation in this important matter.
